-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/17/10 has been entered.

Claim Objections

2. Claim 30 is objected to because of the following informalities: Claim 30, line 1 recites the term "nipple-like" and "stud-like", which are indefinite and should be removed. Appropriate correction is required.

Response to Amendment

3. The declaration under 37 CFR 1.132 filed 9/17/10 is insufficient to overcome the rejection of claim 20 based upon Szafranski et al. and Bronson as set forth in the last Office action because: The placing of Olympians does not have a direct reflection of the equipment used. A new rejection has been set forth below.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 20, 21, 24-30, and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bejean et al. (US 5,029,889 A).

3. With respect to claims 20, 26, Bejean et al. discloses a cross country ski 1 comprising a binding 3 and binding plate 7, 8, 9, 10 which can be glued to the upper surface of the ski, as shown in figures 1-2 and recited in col. 2, lines 1-2. Bejean et al. does not disclose the thickness of the glue layer. The thickness of the adhesive layer is not considered patentable unless it produces an unexpected result, and it would have been obvious to make the adhesive layer under 5-10% of the binding plate of Bejean et al.

4. With respect to claims 21 and 32, the material used to make the binding plate is not considered patentable unless it produces an unexpected result and it would have been obvious to one having ordinary skill in the art at the time of the invention to have made the binding plate of Bejean et al. of any well-known material in order to acquire the materials inherent properties.

5. Claims 25 and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bejean et al., as applied to claim 20 above, and further in view of Loughney (US 4,322,090 A).

Bejean et al. does not disclose the binding plates as having a connection piece. Loughney does disclose a cross-country two-piece binding plate 32, 34 with thinner, displaceable connecting piece 30, as shown in figures 1-12. It would have been obvious to one having ordinary skill in the art at the time of the invention to have provided the binding Bejean et al. with the connecting piece of Loughney in order to increase the rigidity between the binding plates.

Response to Arguments

6. Applicant's arguments with respect to claim 20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey J. Restifo whose telephone number is (571) 272-6697. The examiner can normally be reached on Monday-Thursday 10am-7pm.
